For every two enthusiasts, there are four opinions on how properly to fill woodgrain. In this book, Will Kelly cuts through all that noise and shows how, with a little patience and some inexpensive tools, the average person can turn a modest investment into a gig-worthy instrument and perhaps even a lifelong hobby. Kelly presents guitar-building in a progressive fashion, beginning with a simple Stratocaster-style kit with a bolt-on neck and continuing on to a "relic'd" Telecaster-style build, two Gibson-style set-neck models, and a custom double-neck mash-up. Because each build is more

involved than the previous, the reader builds on his or her skill set and acquires only the tools necessary for the reader's level of interest. Kelly shows how to apply finishes, choose and install hardware, wire electronics, execute the final assembly, and set up the finished guitar for proper action and intonation.

Directory of Contemporary American Musical Instrument Makers Susan Caust Farrell 1981 This unique reference book is a compendium of makers and manufacturers of every variety of musical instrument made in the United States today. It provides names and addresses of instrument makers indexed alphabetically. Each entry gives all known information on the total and annual number of instruments the maker has produced, the number of workers in the shop, the year the individual or firm began manufacturing instruments, whether the instruments are available on demand or made to order, and whether a brochure is available from the maker. Complete cross-references are provided for companies known by more than one name, for partnerships, and for parent and subsidiary firms. Instruments are also indexed, and makers are listed by state for the convenience of the reader. Lists of schools of instrument making and relevant organizations and publications are included as appendixes. The directory will serve two major purposes. First, it will be an invaluable source of information for historians and for the rapidly growing number of collectors of musical instruments, who will be able to use the data gathered here in appraising instruments and tracing their history. The second purpose is simply to increase communication among instrument makers and to make their names available to retail and wholesale outlets for

their products.
